BIO-UV Reinforces Partner Service

BY MarEx (/author/MarEx--) 2014-12-16 13:34:52

BIO-SEA organized in November 2014 a technical seminar (maintenance and commissioning) on its ballast water treatment systems, in its production factory of Lunel, France.

Worldwide partners from the Netherlands, Germany, Greece, Italy, Spain, Singapore, China, Korea, Chili, Cyprus and USA attended the event.

The aim of the seminar was to strengthen the technical skills and precise specific information on the BIO-SEA BWT systems.

Thanks to practical workshops and handling of products, the participants gained a better knowledge on the BIO-SEA systems and are now certified to provide worldwide ship owners with turnkey studies and implementation projects of BIO-SEA systems.
