

BIO-SEA remporte un nouveau contrat avec les chantiers Piriou

BIO-SEA by BIO-UV vient de livrer, aux Chantiers PIRIOU de Concarneau – France, le premier **système BIO-SEA100 en version skid** destiné aux B2M de la Marine Nationale Française.

L'industriel français fournira en effet 3 exemplaires du B2M, navire reconnu pour son endurance et sa robustesse.

Des navires qui permettront de projeter des forces de police et de gendarmerie, porter assistance à la population, lutter contre les incendies, transporter des marchandises... Des bâtiments multi-missions cruciaux pour la surveillance et la protection de nos espaces maritimes en Outre-Mer.
